

Antifreeze

Antifreeze can be deadly to pets, which will lick up spills. Be sure to keep antifreeze in closed containers and wipe up spills immediately. Consider having your antifreeze changed at your local service station, which is equipped to collect and store it for recycling. Ask your local service station or oil change company if they will accept used antifreeze from do-it-yourselfers for recycling. You may be charged a small fee.

* Regional sites that accept antifreeze from any county resident

** S&S Research charges \$1.00/gallon for antifreeze
